

RETHINK TRIMLESS

TRIMLESS

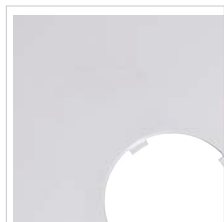

MADE EASY

Liteline and A-line's Pre-Fabricated Drywall Program offers the perfect trimless look you want, while minimizing the concerns surrounding installation, coordination, and quality.

Reduce trimless issues including chipping, cracking, curvy straight-line cuts, and damaged fixtures because "drywall got into it," by specifying our Pre-Fabricated Trimless Program.

PRE-FABRICATED DRYWALL PROGRAM OVERVIEW

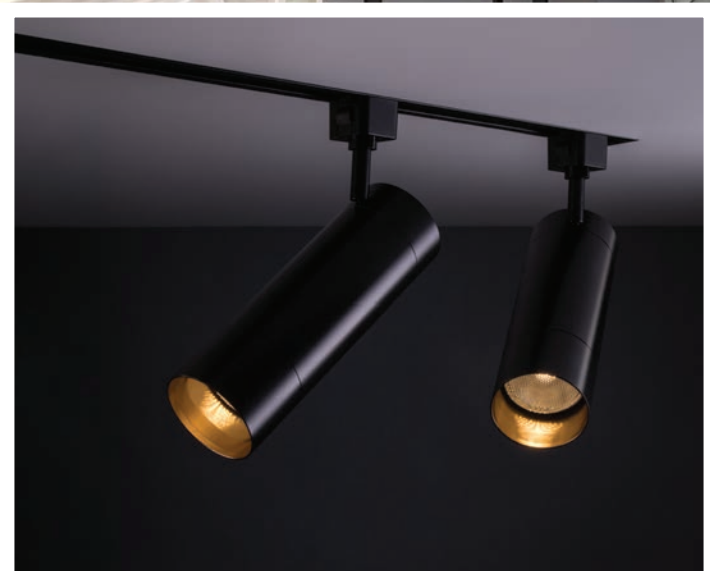

*Recessed downlighting:
A-Line's Helios and
Sigma programs*

*LED Panel: Liteline's
FORUM program*

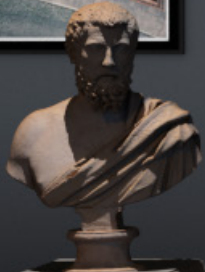

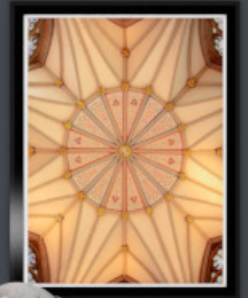

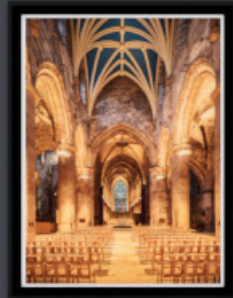

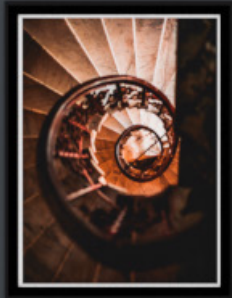

*Liteline and A-Line's track
programs, including the
Klick System*

TRIMLESS

CONTROLLED

Manufactured in a controlled drywall factory, all of Liteline and A-line's trimless products can now be specified with a Pre-Fabricated Drywall Panel or Channel. These panel / channels can easily be installed into the building's frame and mudded in with the surrounding drywall. This reduces installation time, while increasing quality and value. Trimless projects can easily be executed as designed.

TRULY

TRIMLESS

Driving coordination between the various stakeholders involved including the Architect, Lighting Designer, Contractor, and Installer, Liteline and A-Line's Pre-Fabricated Drywall Program strives to get the Level 5 finish with minimal effort!
