

F1 SERIES

LED FILAMENT LAMPS

These A19 (5W/7W) and C35 (2W/4W) line voltage filament LED lamps with shatter resistant coating are dimmable, UV and IR radiation free, minimizing discoloration and fading of materials. LED technology reduces energy and maintenance costs when compared to conventional light sources. Suitable for both residential and commercial applications, for dry locations only. Can be used as a replacement to line voltage incandescent lamps.

These lamps produce a warm white (2700°K) colour temperature which provides up to 810 lumens with a colour rendering index (CRI) of 85 and 25,000 hours LED life.
