ATTRACKT

JUNE 2026

A LINE

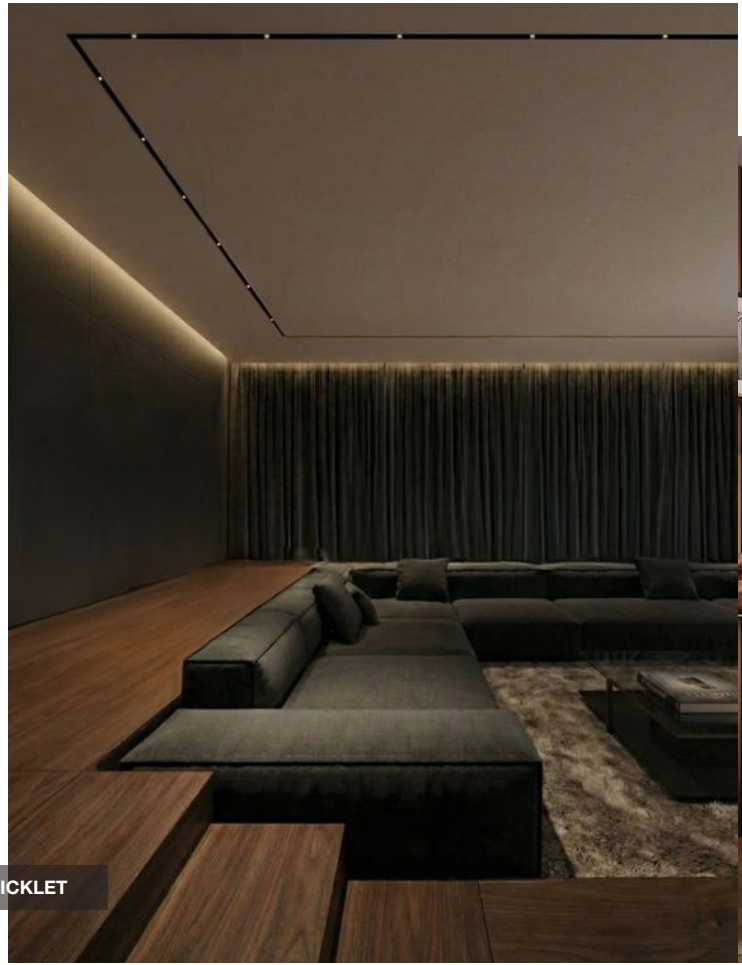

LOW-VOLTAGE TRACK LIGHTING, SCALED DOWN.

ATTRACKT reimagines what track lighting can be, in a profile slim enough to all but disappear. Where conventional track announces itself, ATTRACKT stays quiet and architectural, so the light leads and the hardware recedes. This modular 24V magnetic system puts accent light exactly where your space needs it, and because the track is field cuttable, it sizes to any run on site with no pre-planning. Snap fixtures into place, reposition as the room evolves, and build a lighting layout that's as flexible as your design.

LUXURY RESIDENTIAL

The best home lighting disappears into the architecture. ATTRACKT settles into kitchens, living rooms, and bedrooms, then adapts as life inside them changes. Swap optics and accessories in seconds to shift a beam from artwork to a reading chair, no tools and no rewiring.

RETAIL

SNAP SERIES: SNOOT

Merchandise deserves to be seen at its best. With 90+ CRI, ATTRACKT renders colors faithfully so every product looks the way it should. Two circuits run through a single track, and flipping a fixture 180° switches it from one to the other, so you can split general light from feature accents and re-scene a display without rewiring or moving hardware. Adjustable and magnetic, fixtures adapt to seasonal resets in seconds. When the display changes, the lighting changes with it.

HOSPITALITY

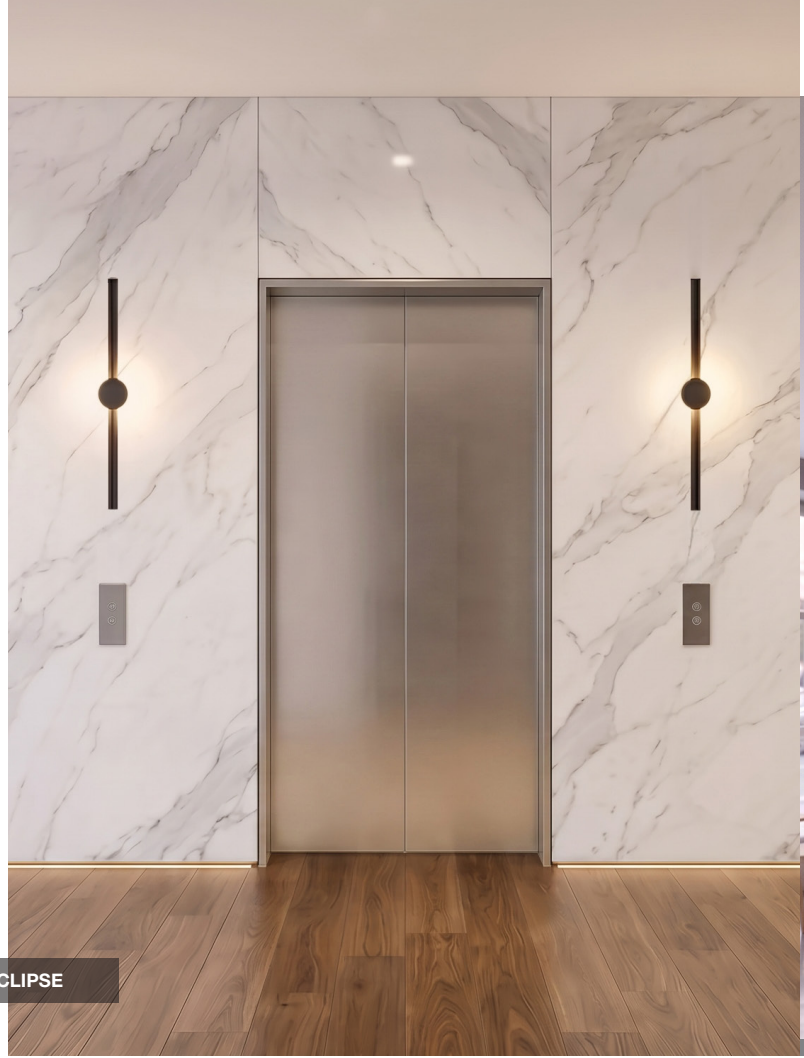

Atmosphere is everything, and the best lighting is felt more than seen. ATTRACKT keeps the hardware quiet and architectural so the mood takes center stage from lobby to lounge. Swap optics to move between a tight wash on a feature wall and a soft pool over a seating group, tuning each zone to its own moment. As the space turns over from day to evening, the layout adapts with it.
