

FOSSIL

TRIMLESS WALL / STEP LIGHTS

Models Shown: FSL3-GYP-O-2W

With minimalism at its core, FOSSIL brings discreet, focused illumination. Available in four shapes with 90+ CRI, the fixture is a 6" × 8" glass fiber reinforced gypsum tile with adjustable metal brackets. Once mounted, the tile is mudded directly into the drywall, so the fixture disappears into the surface for a seamless trimless finish. FOSSIL pairs excellent light output with controlled beam angles to illuminate stair treads and hallways while blending into the architecture.
